PROFESSIONAL SUMMARY

Final-year B.Tech CSE student specializing in AWS cloud infrastructure and DevSecOps CI/CD pipelines. Skilled in building end-to-end automation with Jenkins, Docker, Kubernetes, and Trivy, and deploying secure, highly available architectures on AWS. Seeking a DevOps/Cloud internship to build scalable, production-grade systems.

TECHNICAL SKILLS

Cloud:	AWS (EC2, VPC, ALB, Auto Scaling, RDS, IAM, S3)
Containers:	Docker, Kubernetes
CI/CD & IaC:	Jenkins, Terraform
OS & Scripting:	Linux, Bash
Version Control:	Git, GitHub
Database & Security:	PostgreSQL, Trivy
Programming:	Java, Spring Boot, Node.js, REST APIs

PROJECTS

🐙 NovaPay Bank API – DevSecOps CI/CD & Containerized Deployment July 2026 – Aug 2026

Java 21, Spring Boot, Jenkins, Docker, Trivy, PostgreSQL 16, AWS EC2, SSH, Linux, Bash, Kubernetes

- Designed a Jenkins Declarative Pipeline automating test, build, Docker packaging, and Kubernetes deployment for a Spring Boot + PostgreSQL REST API, triggered on GitHub commits.
- Integrated Trivy to scan Docker images for HIGH/CRITICAL vulnerabilities as a hard security gate; identified and remediated 3 HIGH-severity OpenSSL CVEs via base image upgrade and rescan.
- Deployed the application to Kubernetes using Deployments, Services, ConfigMaps, Secrets, PersistentVolumeClaims, and a Horizontal Pod Autoscaler across 5 API replicas.
- Provisioned initial AWS infrastructure (EC2, VPC, Subnets, Security Groups) before migrating the deployment workflow to a fully automated CI/CD pipeline.
- Resolved Maven build permission failures using UID/GID matching and a custom local repo path, and fixed Trivy scan failures by bypassing default config paths, eliminating root-owned artifact conflicts and restoring pipeline reliability.

🐙 AWS Three-Tier Web Architecture

March 2026 – April 2026

AWS, EC2, VPC, ALB, Auto Scaling, RDS

- Designed and deployed a highly available three-tier web architecture on AWS, separating web, application, and database layers.
- Configured custom VPC with public/private subnets, route tables, IGW, NAT Gateway, and Security Groups for secure network segmentation.
- Deployed application on EC2 instances behind ALB with Auto Scaling Groups for high availability and fault tolerance.
- Integrated Amazon RDS as managed database layer, isolating it within private subnets for improved security.
- Documented complete deployment with architecture diagrams and published source code on GitHub for reproducibility.

EDUCATION

B.Tech in Computer Science & Engineering

2023 – 2027

JSS Academy of Technical Education, Noida

CGPA: 7.87/10

Senior Secondary (10+2)

2020 – 2022

Vidyawati Nigam Memorial Public School, Banda

88.00%

ACHIEVEMENTS

- Selected as Student Placement Coordinator (2026–2027), liaising between recruiters and students.
- Solved 150+ Data Structures & Algorithms problems on LeetCode. [Link](#)
- Completed a hands-on Terraform / IaC practice series, published at 🐙 github.com/Krishna9451/iac-terraform
