PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science student with hands-on experience deploying and managing cloud infrastructure on AWS, containerizing applications with Docker, and working across Linux environments. Skilled in building highly available, scalable architectures using EC2, VPC, Load Balancers, and Auto Scaling, with a foundational understanding of Kubernetes, networking, and DevOps practices. Seeking a Graduate Engineer Trainee, DevOps, Cloud, or Infrastructure Engineer role to apply practical, project-driven cloud and automation skills.

TECHNICAL SKILLS

Cloud (AWS): EC2, VPC, Public & Private Subnets, Route Tables, Internet Gateway, NAT Gateway, Application Load Balancer (ALB), Auto Scaling Groups, Amazon RDS, IAM

Containers & Orchestration: Docker, Docker Compose, Kubernetes

CI/CD & Infrastructure as Code: Jenkins, Terraform

Operating Systems & Scripting: Linux (Ubuntu), Bash Scripting

Version Control & Collaboration: Git, GitHub

Databases: PostgreSQL, Amazon RDS

Networking & DevOps Concepts: Networking Fundamentals, DevOps Fundamentals

Security: OWASP ZAP (Security Testing)

Programming & APIs: Java, Node.js, REST APIs

PROJECTS

AWS Three-Tier Web Architecture

Personal Project | AWS, EC2, VPC, ALB, Auto Scaling, RDS

- Designed and deployed a highly available three-tier web application architecture on AWS, separating web, application, and database layers.
- Configured a custom VPC with public and private subnets, route tables, an Internet Gateway, a NAT Gateway, and Security Groups to enforce secure network segmentation.
- Deployed the application on EC2 instances behind an Application Load Balancer with Auto Scaling Groups to ensure high availability and fault tolerance.
- Integrated Amazon RDS as the managed database layer, isolating it within private subnets for improved security.
- Documented the complete deployment process with architecture diagrams and published source code on GitHub for reproducibility.

Dockerized Employee Management Application

Personal Project | Docker, Docker Compose, PostgreSQL, Git

- Containerized a full-stack web application using Docker to standardize the development and deployment environment.
- Orchestrated multi-container deployment of the application and PostgreSQL database using Docker Compose.
- Configured persistent storage using Docker Volumes to ensure database data durability across container restarts.
- Managed source code versioning and collaboration workflow using Git and GitHub.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering

JSS Academy of Technical Education, Noida | 2023 – 2027 | CGPA: 7.87/10

Senior Secondary (10+2)

Vidyawati Nigam Memorial Public School, Banda | 2022 | 88.00%

ACHIEVEMENTS

- Selected as Student Placement Coordinator (2026–2027), liaising between recruiters and students to coordinate campus placement drives.
- Solved 200+ Data Structures & Algorithms problems on LeetCode, strengthening problem-solving and coding proficiency.
- AWS Certified Solutions Architect – Associate (In Progress).
